**SACRAMENTO—ROSEVILLE—ARDEN-ARCADE METROPOLITAN STATISTICAL AREA (MSA)  
(EL DORADO, PLACER, SACRAMENTO, AND YOLO COUNTIES)  
Seasonal gains in retail trade led month-over job growth**

The unemployment rate in the Sacramento--Roseville--Arden-Arcade MSA was 3.5 percent in November 2018, unchanged from a revised 3.5 percent in October 2018, and below the year-ago estimate of 3.9 percent. This compares with an unadjusted unemployment rate of 3.9 percent for California and 3.5 percent for the nation during the same period. The unemployment rate was 3.4 percent in El Dorado County, 3.0 percent in Placer County, 3.5 percent in Sacramento County, and 3.9 percent in Yolo County.

**Between October 2018 and November 2018**, combined employment in the counties of El Dorado, Placer, Sacramento, and Yolo, increased by 7,300 to total 1,010,100 jobs.

- Trade, transportation, and utilities (up 4,700 jobs) led the region with a normal seasonal job gain from October to November as holiday hiring began. Retail trade (up 4,500 jobs) was responsible for 95.7 percent of the gains.
- Educational and health services advanced by 2,100 jobs. All of the job additions were in health care and social assistance.
- Government reported a month-over increase of 1,400 jobs. Local government picked up 1,300 jobs. State government added 200 jobs. These gains offset a slight loss in federal government, which was down 100 jobs.
- Meanwhile, four major industries experienced job declines from October to November, led by farm (down 1,300 jobs), other services (down 500 jobs), construction (down 300 jobs), and information (down 100 jobs).

**Between November 2017 and November 2018**, total jobs in the region increased by 14,800, or 1.5 percent.

- Government continued to lead year-over growth, adding 5,400 jobs. State government gained 3,400 jobs. Local government was up 2,300 jobs. These gains offset a decrease in federal government, which was down 300 jobs.
- Educational and health services expanded by 4,900 jobs. Health care and social assistance grew by 4,500 jobs. Education services added 400 jobs.
- Trade, transportation, and utilities gained 2,500 jobs since last November. Wholesale trade and transportation, warehousing, and utilities each contributed 1,100 jobs. Retail trade increased by 300 jobs.
- The largest decrease occurred in professional and business services with a decline of 600 jobs. Three other sectors also reported employment declines: construction (down 500 jobs), information (down 300 jobs), and farm (down 200 jobs).

**Notes:**

- 1) Data may not add due to rounding. All unemployment rates shown are calculated on unrounded data.
- 2) These data are not seasonally adjusted.
- 3) N/A = Estimate created by Bureau of Labor Statistics

**Methodology:**

Monthly city labor force data are derived by multiplying current estimates of county employment and unemployment by the relative employment and unemployment shares (ratios) of each city at the time of the 2009-2013 American Community Survey. Ratios for cities were developed from special tabulations based on ACS employment, unemployment, and population

### Data Not Seasonally Adjusted

and Census population from the Bureau of Labor Statistics. For smaller cities and CDPs, ratios were calculated from published census data.

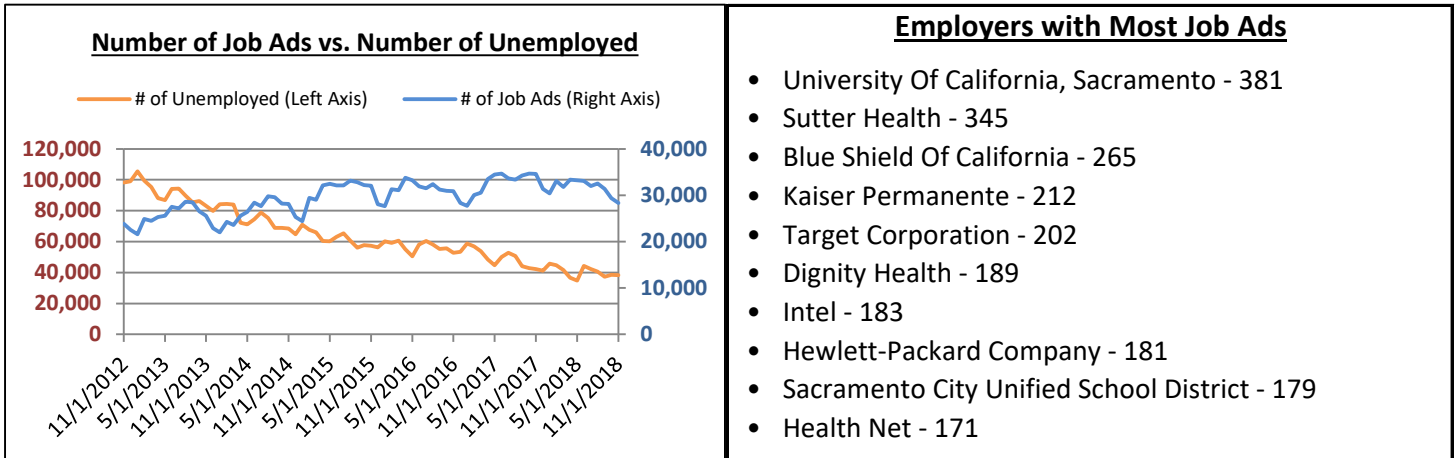

Monthly CDP's labor force data are derived by multiplying current estimates of county employment and unemployment by the relative employment and unemployment shares (ratios) of each CDP at the time of the 2011-2015 ACS survey. Ratios for CDPs' were developed from special tabulations based on ACS employment and unemployment from the Bureau of Labor Statistics.

This method assumes that the rates of change in employment and unemployment since the 2009-2013/2011-2015 American Community Survey are exactly the same in each city and CDP as at county level (i.e., that the shares are still accurate). If this assumption is not true for a specific city or CDP, then the estimates for that area may not represent the current economic conditions. Since this assumption is untested, caution should be employed when using these data.

CDP is "Census Designated Place" - a recognized community that was unincorporated at the time of the 2011-2015 5-Year American Community Survey (ACS).

- 1) Data may not add due to rounding. All unemployment rates shown are calculated on unrounded data.
- 2) These data are not seasonally adjusted.
- 3) N/A = Estimate created by Bureau of Labor Statistics

**Methodology:**

Monthly city labor force data are derived by multiplying current estimates of county employment and unemployment by the relative employment and unemployment shares (ratios) of each city at the time of the 2009-2013 American Community Survey. Ratios for cities were developed from special tabulations based on ACS employment, unemployment, and population and Census population from the Bureau of Labor Statistics. For smaller cities and CDPs, ratios were calculated from published census data.

Monthly CDP's labor force data are derived by multiplying current estimates of county employment and unemployment by the relative employment and unemployment shares (ratios) of each CDP at the time of the 2011-2015 ACS survey. Ratios for CDPs' were developed from special tabulations based on ACS employment and unemployment from the Bureau of Labor Statistics.

This method assumes that the rates of change in employment and unemployment since the 2009-2013/2011-2015 American Community Survey are exactly the same in each city and CDP as at county level (i.e., that the shares are still accurate). If this assumption is not true for a specific city or CDP, then the estimates for that area may not represent the current economic conditions. Since this assumption is untested, caution should be employed when using these data.
